Notes for Installation

- 1. Polygal's profiles must be installed with the solar protected layer facing out.
- 2. Use a rubber mallet to engage cap into base profile. Make sure you fully couple the tow profiles along their entire length.
- 3. When calculating rebate depth between sheet and profile, make sure you allow for the material's thermal expansion.
- 4. Calculate the width and the allowed load using Polygal Technical Support (PTS) software.
- 5. Maintain a minimal inclination of 10% when installing in flat structures.
- 6. Profiles are supplied in standard 6-meter lengths. Other lengths are available-contact your distributor for details.

Polygal is the leading manufacturer of structured polycarbonate sheets, and is known throughout the world for the outstanding quality of its products.

Polygal was the first manufacturer in the world to create structured polycarbonate sheets, and over the last 30 years has developed and produced a broad spectrum of these products, which are successfully covering a full array of structures worldwide.
